

[LIST \(Land Information System Tasmania\)](#)

<https://maps.thelist.tas.gov.au/listmap/app/list/map>

The link above has a range of information of the suitability of various farming pursuits in Tasmania and could be useful to confirm the suitability of the plantings.

If there is no layer for your enterprise, use the “crop rules” such as cold climate, frost, rainfall requirements and you can select an enterprise close to these rules.

- Open the link
- On the top right hand side, click on LAYERS and then Add Layer +.
- After the list pops up, scroll down to Primary Industries and pick Farming (29 layers).
- Select the layer you want  – eg Blueberries.

You will need to adjust the transparency down to enable you to see other features on the map, eg roads.

- When you open the link, on right hand side, click on LAYERS and then Add Layer +.
- Search for Climate and a large list will appear.
- Select the layer you want  – eg Frost. Again you will need to adjust the transparency.
- There is also information layers for soil, temperature, rainfall. This website is constantly being updated as data is made available.
